Custom Filter Mounting for M12 Lenses

Vision systems are increasingly utilizing S-mount (M12) lenses to achieve a leaner system design, lighter weight and smaller footprint.

We offer filter mounting solutions ideal for these types of applications:

- Small profile slip-on mounts which secure to the lens with a locking screw.
- For extremely wide-angle M12 lenses, we offer the option to cement (mount) the filter behind the lens closer to the sensor.

How to Order

To order, first select your filter type (e.g. BP470), then measure the outside diameter of the lens in millimeters (e.g. 14). Use “S” for slip and add the outside diameter of the lens followed by the letter “A” (e.g. BP470-S14A).

Outside Diameter Range	Part # Suffix
13.2-14.2mm	-S14A
14.3-15.0mm	-S15A
